

## ARD Alpha German Education TV - Superhuman Miroslaw Magola

Miroslaw Magola on the German leading education television ARD Alpha - „Odysso Superhelden“, Odysso Real Life Superheroes.

Superhuman Miroslaw Magola claims he uses telekinesis power to manipulate metal objects just like X-Men supervillain. Magneto is a fictional character appearing in American comic books published by Marvel Comics, commonly in association with the X-Men. Created by

writer Stan Lee and artist Jack Kirby, the character first appears in The X-Men 1 as the archenemy of the X-Men. The character is a powerful mutant, one of a fictional subspecies of humanity born with superhuman abilities, who has the ability to generate and control magnetic fields.

Mirosław Magola was born in Poland and is now living in Munich Germany. He is known as the "Magnetic Man" in the media as having the ability to lift objects made of metal, ceramic, wood or plastic off the floor, against the force of gravity. He holds them against his hands, and moves them vertically or in circles, without any aid.

He showed his talent for the first time on the ProSieben German television programme Arabella (Talk Queen), the OPAH of Germany, hosted by Vienna Eurovision Song Contest Contepresenter Arabella Kiesbauer. Also in February 1996 he was able to perform his unique ability on the UK television live programme Beyond Belief hosted by Sir. David Frost.

His best performance to date was on a Live French television programme 2009 La Soirée de l'Etrange hosted by Christophe Dechavanne and Patrice Carmouze aired on TF1, unfortunately reproduction is restricted by copyright.

"Clever - the show that creates knowledge" - "Clever - die Show, die Wissenschaft" - "Clever - the show that creates knowledge" on TV Sat.1 in Germany with scientific experts Wigald Boning and Barbare Eligmann and guests - among others Magnetic Man, entertainer and businesswoman Verona Pooth and German rapper Sido.

In Clever! Special "Die unglaublichen Kräfte der Natur!" - "The incredible forces of nature!" Mirosław Magola underwent scientific investigations of his abilities and impressed the audience.

The Sat.1 show Clever! received the 2005 German Television Award ARD, ZDF, RTL, ProSieben, Sat.1

On the History Channel television show "Stan Lee's Superhumans" in September 2010 however, demonstrated changes to Mirosław Magola's brain waves, skin conductance and temperature. These changes were significant and were recorded during one of his demonstrations.

Mirosław Magola was investigated by Dr. Friedbert Karger of the Max Planck Institute and Dr. David Lewis, a neurophysiologist at MindLab, one of the United Kingdom's leading Neuro Research Centers and Dr. Konstantin Korotkov, professor of Physics at St. Petersburg State Technical University in Russia.

It's taken 2000 years from the discovery of the idea of the Atom to the present, but it is hoped with our present sophisticated equipment we can greatly shorten the time of further discovery.

Dr. Michio Kaku is the author of several widely acclaimed science books, including Parallel Worlds, Visions, Beyond Albert Einstein, Hyperspace and Physics of the Impossible, the basis for his Science Channel TV show, Sci Fi Science: Physics of the Impossible and the host of two radio programs, Explorations and Science Fantastic said in his latest work, The Future of the Mind, uses his brand of theoretical physics - a beguiling mix of quantumness and consciousness - to push past the current frontiers of neuroscience. The world's media spoke with this bravely unusual mind about where today's most daring scientific research is taking our brains. Our sit-down adventure included storied science notions like telekinesis,
